

a b c w w d e w g w w f w w w

先序遍历创建树.

代码的运行:

入	a	b	c	#	#	d	e	#	g	#	#	f	#	#	#
栈	a	b	c	c	b	d	e	e	g	g	d	f	f	a	#

出	c	b	e	g	d	f	a
---	---	---	---	---	---	---	---

一边建树, 一边遍历
